

- Keep track of your mobile workers in real time
- Increase productivity
- Improve customer service and response times
- Comply with duty of care, occupational health and safety and personal security regulations or legislation
- Use in vehicles as an alternative to fixed vehicle tracking systems

### Overview

The SuperTrack 2100/S is a GPS tracking, personal protection and voice communication device.

### Real time GPS tracking

The location of the device can be monitored with the SuperTrack on-line software, showing its current location, heading and speed.

### Personal Protection

The 2100/S incorporates many security functions such as the ability to send different types of alerts, including SOS and man down.

### Voice communication

The 2100/S can make voice calls and receive phone calls.

### Functions

#### Regular status reporting

The 2100/S sends status reports every 60 seconds. Each report shows the time, position, speed, direction of travel and battery level.

#### Personal Tracker / Lone Worker Protection Device

#### Configurable geo-fences

The 2100/S can be configured with an unlimited number of geo-fences (virtual boundaries in a real-world geographic area), and alerts will be triggered if the device crosses any boundary.

### Parking geo-fence

The 2100/S has a parking geo-fence function which is effective as an anti-theft device. If the unit moves away from its set location an alert will be generated.

### Event-triggered alerts

The 2100/S can automatically send multiple alerts via web pop-ups, email or SMS when:

- SOS or help buttons are activated
- The device strays inside or outside a geo-fence zone
- Low battery level is detected
- The device begins to move after being stationary
- The device exceeds a pre-determined speed
- The man down function is triggered

### Device Polling

The status of the 2100/S can be requested at any time, either via the web interface or from a mobile phone by SMS.

### Highlights

- Small, light and concealable (92mm x 44mm x 18mm – 80 grams weight)
- Rugged and weatherproof
- Simple to operate
- Power saving functions
- Web-based operability and easy integration with other software and systems
- Industry leading SiRF Star III GPS for high signal reception, sensitivity and accuracy
- LED indicators for GPS signal, GPRS signal and battery power
- Text messages can be sent to up to five different phone numbers
